Dear Gergely,

Frankly we don't mind at all if you upload and use the published version. SpringerNature will never come after you. Maybe IST won't like it? In the very improbable case that someone bothers you about it, just say that you received a special authorization from the editor, and I will confirm. I have checked the versions we have and the proofs have ugly annotations on them and anyway already integrate work from the publisher (typesetting, figure, language editing...). The only possibility would be the temporary draft Word document I'm attaching here (just add your version of the figure in it so it is 1 self-contained file only).

But frankly, don't bother. Just upload the published version. It is much nicer!

Guillaume

Dear Guillaume,

sorry to bother you - we are here at IST Austria obliged to upload a pdf of every published item - in a way which is not violating copyright law.

we have to upload a version of our N&V, but we only have the published pdf version, which is clearly not OK due to legal reasons. Do you by any chance have a proof version or anything equivalent which would be suitable for putting it online without having legal trouble? If you could help us in any way, we would be most grateful.

Thanks a lot in advance for your reply and help, best,

Gergely Molnar & the co-authors
